AI strategy / Enterprise technology / Leadership

Brian McKew.

Business perspective. Technology leadership.

Brian brings a business owner's perspective to AI transformation and enterprise technology, connecting strategy, people, partnerships and delivery.

Business leader · Co-founder · Author

OFFICIAL BIOGRAPHY

Brian McKew brings more than 25 years of experience in enterprise technology, commercial leadership and team management across the US and UK. His career spans technical operations, entrepreneurship and roles at Logicalis, Atos, HPE, Dell and Fujitsu. He is co-founder and Head of Delivery at Intelligenta Digital, where his work includes AI strategy, workflow design and delivery. Brian is the author of **AI Revolution in Chemistry**, published by the Royal Society of Chemistry. He divides his time between Florida and the UK and writes and speaks about AI adoption, technology leadership and the role of human judgement.
